## **ProAct Safety to Host 2024 Global Safety Excellence Experiences**

*Internationally recognized expert and influencer, Shawn M. Galloway, announces public events to build capacity for leaders.*

(Houston, TX – October 3, 2023) ProAct Safety, Inc., a global leader of safety excellence strategies, will host several of their popular professional development workshops throughout 2024. The workshops are strategically targeted to the five core capacities for safety excellence.

**Strategy:** Most safety efforts focus on failure metrics. Failing less is not a strategy. [Inside Strategy workshops](#) concentrate on safety goals and plans to achieve them. This advanced workshop is for developed organizations who want to elevate their performance. Attendees will leave with the competency and confidence to create a strategic roadmap for their companies.

**System:** When focused on and managed well, the five core capacities for safety excellence synergize to produce sustainable results. The [Safety Excellence Master Class](#) thoroughly examines these five capacities to improve safety performance and culture.

**Leadership:** Teaching supervisors to coach for performance is critical and an effective way to inspire team building. [Leadership Safety Coaching workshops](#) focus on getting the best out of people by helping them perform at their best. Attendees will learn and be provided tools to influence behavior, culture and performance.

**Engagement:** The [Lean BBS Certification workshop](#) is all about employee engagement. You cannot have a good safety process without the buy-in of the customers of the program. Nobody wants to get hurt, and behavior-based safety is a proven way to give workers a narrow focus that maximizes impact to reduce injuries. Integrating lean principles makes this especially effective.

**Cultural:** The [STEPS to Safety Culture Excellence<sup>SM</sup> workshop](#) will cover strategies for customizing processes and developing a 3-5 year safety excellence business plan. STEPS (Strategic Targets for Excellent Performance in Safety<sup>SM</sup>) is a universal method for identifying, prioritizing and solving safety issues using a single process.
